Settings
Production settings table

With the left-hand entry field, a component is placed on the upper one if possible

If there is no room for a another component, the view will skip to the next page. The component has to be selected there again.

Change to the next or previous page with the further setup of the chart

Pallet structure can be dynmically extended
- If a level if full, the view skips to the next page
-Each component can be selected, can be separately deleted or added below one of the three basic components
-The part number can be set for the appropriate components
-- There can be 160 components

Shows the current page

The number of parts has to be given in the selection.

Button to change to the view with the parameter entry

Button to accept the setting. (red, if new settings are not accepted).

Count values

DRÄXLMAIER

This counter cannot be adjusted.
It is the result of „OK parts current position“ and the packaging structure.

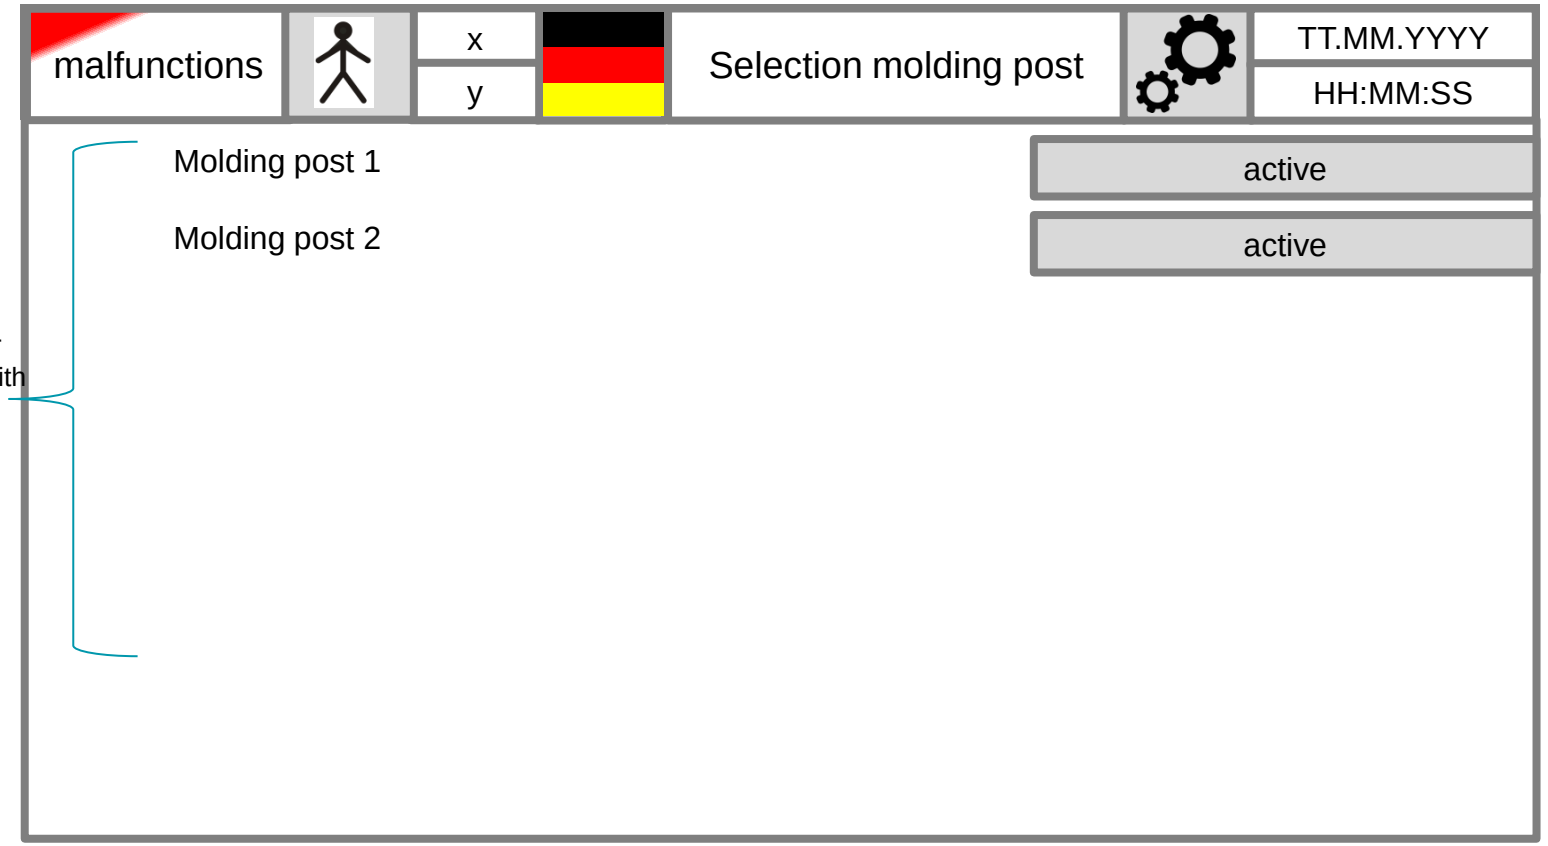

This counter can be changed (click on count value and enter the new value).

The count values shown here are the same as in the production view.

General information

The display and the individual views are to be prepared in according with this document.
If e.g. certain buttons (e.g.: Transfer, Offline,etc….) are not needed, they may still be provided in the layout and by the space allocation – but they have to be faded out. (May not be visible or selectable).

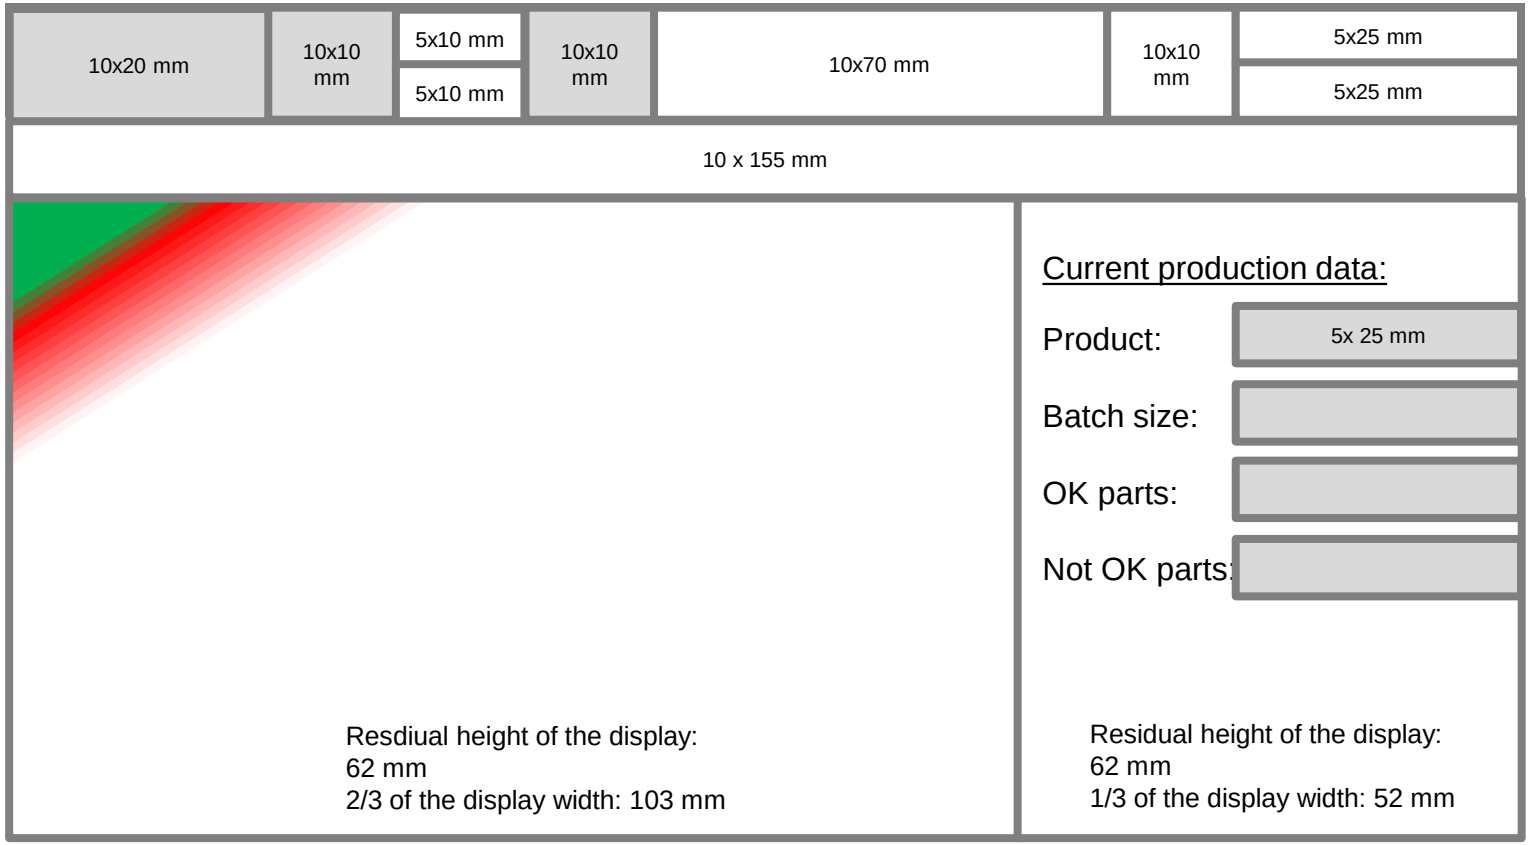

The proportions in the tables have to be implemented according to this document.
The texts have to be adapted in the table sizes.

Changes have to be approved by the Client.
